

## EUROLINE PREMIUM®

**Euroline Premium®** Netting has the following advantages:

- Single mesh instead of double can now be used in larger cod ends
- Smaller twine can be used in existing trawls so greater towing speed can be achieved.
- Lower fuel consumption.
- Much more economical than knotless netting material and only slightly higher than standard **Euroline®** netting.
- Clean fishing, easy handling and good knot stability.
- Good abrasive resistance and stable elongation.

Diameter mm	Runnage m/Kg	Breaking Strength Kgf
1,3	830	62
2,0	370	130
2,5	290	145
3,0	250	192
3,5	200	243
4,5	115	417
5,5	81	567
6,0	62	734
8,0	36	1117

### Bottom Trawl Applications

This is a significant aspect where there is a big advantage in using **Euroline Premium®** Netting:

- Smaller diameter twines with the same breaking strength can be used

### Mid Water Trawl Applications

**Euroline Premium®** Netting is made with filaments that are stronger than nylon fibres.

**Euroline Premium®** Netting provides characteristics very suitable for mid water trawl applications:

- Good Elongation
- Good shock absorption
- Good stretch recovery
- High strength, high abrasion resistance

**Euroline Premium®** is a polyethylene netting which, in addition to its strength and abrasion resistance, offers a clean fishing like all the polyethylene materials.
